How to make the most of the PremierFlex Medical Plan to achieve true medical freedom on the healthcare journey¹

Case 1

Ms. Tong is the regional account director for a multinational advertising company. Many years ago, she purchased a **PremierFlex Medical Plan** with global coverage (Plan 4) for herself, ensuring she receives quality medical services for life, no matter where she is.

At age 45, Ms. Tong underwent a mammogram under her plan's wellness benefit, which detected a suspicious lump. For further evaluation, Ms. Tong underwent prescribed diagnostic imaging tests as recommended by her doctor, which ultimately diagnosed her with stage 2 breast cancer. The doctor recommended that she should undergo a mastectomy with breast reconstruction surgery, followed by post-operative radiotherapy.

Ms. Tong eventually decided to seek medical treatment in the US. She made an appointment with the relevant hospital through the Medical Concierge overseas. During her hospitalisation, she stayed in a private room.

At age 60, Ms. Tong was diagnosed with stage 2 lung cancer. Through the plan's Medical Green Channel in mainland China, she underwent tumour removal surgery at a 3A-Grade hospital, accompanied by medical care staff. During her stay, Ms. Tong stayed in a standard single room in the VIP unit, receiving a high-quality medical experience. Since the hospital is also within the Medical Expenses Direct Billing network, Ms. Tong didn't need to pay the pre-approved medical costs herself and could concentrate on her treatment.

5

6

To be safe, Ms. Tong obtained a Second Medical Opinion from a US medical expert through an online consultation via the plan's Dedicated Critical Illness Case Manager and received the same advice.

Afterwards, Ms. Tong used the plan's rehabilitation benefits to receive rehabilitation treatment from a registered physiotherapist and made a full recovery.

In addition to the surgery, Ms. Tong also found the necessary cancer treatment drugs through the Global Drug Search service. She has now recovered and is in good health.

¹The above examples are for illustrative and general reference purposes only.

Case 2

Mr. Chan, a Hong Kong resident, has been living in Shanghai with his family for work. He purchased the **PremierFlex Medical Plan** covering Greater China (Plan 2) for himself, his wife and daughter. They also purchased the designated supplementary outpatient benefit – **“Outpatient Care Benefit”** to ensure they could receive quality medical services if they were ill.

One early morning, Mr. Chan’s 5-year-old daughter, Yi Lok, suddenly had a fever and her temperature could not be reduced after various attempts. Through the telemedicine service and medication delivery (in mainland China) of the **“Outpatient Care Benefit”**, Yi Lok received a doctor’s virtual consultation and later had the medication home delivered.

Yi Lok was diagnosed with acute leukaemia and needed to undergo chemotherapy as soon as possible. Considering the time required for the entire treatment and recovery process, Mr. Chan decided to have Yi Lok treated in Hong Kong so that their relatives could help take care of her.

Once Yi Lok was home, she continued to receive rehabilitation benefits under the plan, including targeted treatment from a registered traditional Chinese medicine practitioner. Yi Lok has now recovered and is in good health.

Afterwards, Yi Lok continued to show signs of persistent fatigue and loss of appetite. Mr. Chan sought advice from the plan’s Healthcare Consultant service and learned that the continuous loss of appetite could be related to problems with her immune system or blood diseases, and they should not be ignored. Mr. Chan was advised to take Yi Lok to the hospital for a more thorough examination. Through the Medical Green Channel in mainland China, he was able to swiftly make an appointment for Yi Lok at a renowned 3A-Grade hospital for a check-up.

During the treatment, Yi Lok’s mother closely took care of her and the eligible costs for having an extra bed during her hospital stay were fully covered.

Key risks

How may our credit risk affect your policy?

The guaranteed cash value (if applicable) and insurance benefit of your plan are subject to our credit risk. If we become insolvent, you may lose the value of your policy and its coverage.

How may currency exchange rate risk affect your benefits?

Foreign currency exchange rates may fluctuate. As a result, you may incur a substantial loss when you choose to convert your benefits to other currencies. Additionally, the conversion of your benefits to other currencies is subject to exchange restrictions applicable at the time when the benefits are paid. You have the sole responsibility to decide if you want to convert your benefits to other currencies.

How may inflation affect the value of your plan?

We expect the cost of living to rise in the future because of inflation. That means the insurance you take out today will not have the same buying power in the future, even if the plan offers increasing benefit intended to offset inflation.

What happens if you do not pay your premiums?

You should only apply for this product if you intend to pay all of its premiums. If you miss any of your premium payments, we may terminate your policy and you would lose the policy's coverage.

Why may we adjust your premiums?

We have the right to review and adjust the plan's premium rates for particular risk classes on each policy anniversary, but not for any individual customer.

We may adjust premium rates because of several factors, such as our claims and persistency experience, medical price inflation, projected future medical costs and any applicable changes in benefit.

Why may we change your benefits?

We have the right to revise the Benefit Schedule and the terms and conditions under this plan on each renewal by giving you 30 days' notice in writing. This is to account for any known or foreseeable changes in medical practices and claims experiences. We will apply the revisions to all policies under the plan. The premium will be adjusted accordingly based on the rate as determined by us.

Important information

Suicide clause

If the life assured commits suicide whether sane or insane, within 1 year from the effective date of the policy or from the date of any reinstatement, whichever is later, we will limit all the death benefits to a refund of the premiums paid without interest. We will deduct any amounts we have already paid and any amounts you owe us under the policy.

Cancellation right

A customer who has bought the life insurance plans has a right to cancel the policy within the cooling-off period and obtain a refund of any premium(s) and levy(ies) paid less any withdrawals. Provided that no claim has been made, the customer may cancel the policy by giving written notice to us within 21 calendar days immediately following either the day of delivery of (1) the policy or (2) the notice (informing the availability of the policy and expiry date of the cooling-off period) to the customer or his / her nominated representative, whichever is earlier. Such notice must be signed by the customer and received directly by Prudential Hong Kong Limited at 8/F, Prudential Tower, The Gateway, Harbour City, 21 Canton Road, Tsim Sha Tsui, Kowloon, Hong Kong within the cooling-off period.

The premium and levy will be refunded in the currency of premium and levy payment at the time of application for this policy. If the currency of premium and levy payment is not the same as the plan currency, the refundable premium and levy amount in plan currency under this policy will be converted to the currency of premium and levy payment at the prevailing currency exchange rate as determined by us in our absolute discretion from time to time upon payment. After the cooling-off period expires, if a customer cancels the policy before the end of benefit term, the actual cash value (if applicable) may be substantially less than the total amount of premiums paid.
